## **Visiting committee report and justification accepted by the MAB board**

Based on the institutional self-evaluation and on-site visit, it can be established that the Debrecen Reformed Theological University operates a uniform quality assurance system covering the entire institution based on the ESG (Standards and Guidelines for Quality Assurance in the European Higher Education Area) standards.

The institution's quality assurance and development processes are planned, and its planning, control, measurement and evaluation procedures are regular. The relationship between management processes and quality assurance processes is strong, the management of education and research is adequate, and its directions are in line with the institutional strategy.

The supporting processes – financial, management, IT, facility management and the infrastructure provide a good background for educational and research activities.
